Examiner's signature, if required

Application No. 09/827,810

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's representative gave a clear summary of what the invention is about and Examiner has pointed out that the claim as it was does not put forward any clear distinguishing features when compared to the space reclaiming purpose and approach by the Alpern reference. It is then noted that if a form 1449 has not been acknowledged, another IDS form can be faxed in officially; and also suggested by the Examiner was that the claim can be amended to include more specific details about how the control information is stored to support the fault prevention or supervisional approach of the invention. And Examiner has expressed willingness to receive a proposed amendment draft via Email/Fax for preevaluation should this be necessary.
